Abstract

-- A universal computer controlled display terminal provided with a withdrawable card with stored data specific to the user of ~~said~~ the card and a process responsive to the stored data for displaying on ~~said~~ the terminal a layout of user interactive graphics personalized to ~~said~~ the user. The invention is very effective in display terminals including a user interactive input touch screen having ~~said~~ the layout of graphics personalized to ~~said~~ the user. The layout of graphics may include a set of enlarged touch pads. The layout may also include images personalized to ~~said~~ the user. The user card may also include integrated circuitry associated with ~~said~~ the stored data, e.g. a smartcard. The data displayed responsive to the data stored on the card may also include text personalized to the user. The text may be in a language personalized to ~~said~~ the user, or the text may be in an enlarged character font. --
